## Education

### Career Accelerator Program

Prepleaf by Masai  
December 2023-present

**Civil Engineering, B.Tech**  
CVR College Of Engineering  
June 2017 - July 2021

## Technical Skills

JavaScript   Redux   React  
Node.js   Git   Express.js  
MongoDB   RESTful APIs  
HTML5   CSS3  
Responsive Web Design

## Soft Skills

Time Management  
Adaptability   Teamwork

# Madgula Vamshi

## Full Stack Web Developer

## Professional Summary

Dynamic Full Stack Developer proficient in JavaScript and the MERN stack, with expertise in developing and maintaining scalable web applications. Skilled in designing efficient APIs with Node.js and Express.js and creating seamless user experiences with React. Adept at leveraging Generative AI and swiftly learning new technologies.

## Projects

### Jumia Clone   [Live Demo Link](#)   [Github Repo Link](#)

React   JavaScript   Node.js   Express.js

MongoDB   RESTful APIs

Responsive Web Design   Git   Redux   HTML5

CSS3

- Developed a comprehensive clone of the Jumia e-commerce website using the MERN stack (MongoDB, Express.js, React, Node.js).
- Integrated essential e-commerce functionalities like user authentication, product listings, detailed product pages, and search functionality.
- Utilized JWT authentication for secure user sessions and implemented CRUD operations for managing products and users.
- Implemented RESTful APIs to facilitate smooth communication between frontend and backend components.

### Croma Clone   [Live Demo Link](#)   [Github Repo Link](#)

JavaScript   React   Git   HTML5   CSS3   Redux

- Built a Croma clone with a well-designed interface and responsive layout using React and Tailwind CSS.
- Implemented login/logout functionality and an add-to-cart feature similar to e-commerce websites.
- Overcame coding challenges and improved the project through user feedback, providing an excellent user experience.
- Ensured the site works well on different devices using responsive web design.
